All Teamster Henry Ford Genesys Techs & Therapists:

Henry Ford's unethical labor practices unfortunately do not stop with the RNs.

Yesterday, Thursday, August 28, 2025, the Union was informed by Henry Ford Genesys that the long standing negotiated Longevity Payment will not be paid today, August 29, 2029, (the contractual due date) to any of the Technical Bargaining Unit employees.

Henry Ford's "reason" is as follows: "...due to the complexities involved with extracting information from Ascension, we have been unable to accurately identify LTD from July until the date of the Joint Venture."

Teamsters Local 332 strongly believes this is an attempt by Henry Ford to intimidate, harass and be punitive to our members because of the impending RN strike on Monday, September 1, 2025.

This is a GROSS violation of the Technical Collective Bargaining Agreement and Teamsters Local 332 does not take this lightly.

A grievance has been filed, and we will pursue all legal avenues until this matter is resolved.

Stay tuned for updates on this matter.

STAY UNITED!!! STAY STRONG!!!!

In Solidarity,

Dan Glass, President
